SEBOL Programming Training
Course 8500 . Course Syllabus .
Day 1. o Build Sequential
Function Charts. o Create a
program to run a batch process
without Units. o Exercises
Day 2. o Unit concept o Create
3 Units with all supporting code
and elements o Exercises.
Day 3. o Identifiers, data type,
comparison operators, and
compiler directives. Fri, 11

- Hello. I want to learn SEBOL
but i can't find anything about
it. Can someone give me an
tutorial, some examples, for
learning it? For example i
want to make an CALCU block
for the calculation of the
productions of the factory,

- A symbol in computer
programming is a primitive
datatype whose instances have
a unique human-readable form.
Symbols can be used as
identifiers. In some programming
languages,

they are called atoms. Uniqueness
is enforced by holding them in a
symbol table. The most common
use of symbols by programmers
is for performing language
reflection, and most common
indirectly is their use to create
object linkages. In the most
trivial implementation, they are
essentially named integers. Wed,
